m = 10 trees, random selection
m = 25 trees, random selection
m = 50 trees, random selection
Share of kept rows that are correct
0.0
0.2
0.4
0.6
0.8
1.0
Share of its table the attacker keeps (most confident first)
Prior-guided sampling
Public statistics only (no trees)
Per-tree counting (per copy)
Joint solves, solver seed only
